RE: Draft Recommendation Application for Declaration by Services Sydney

Dear Sir,

Sydney Water should not have a monopoly in disposing of wastewater at the main ocean outfalls, particularly at North Head.

Others should have the opportunity of capturing wastewater and processing it in a more environmentally suitable way. This is especially relevant in view of Sydney's current water storage/usage crisis.

I urge you to consider a longer declaration period than 15 years, more than 30 years would be a more sensible approach.

Thank you for your consideration on this issue.

Yours sincerely
Cathy Griffin
Local water user and resident living close to an ocean outfall
